

Game Time

Rounded Differences

Ready

You will need:
paper clip and pencil
paper and pencil

Set

Place the pencil with the paper clip in the center of the spinner shown above. Spin the paper clip to generate digits for two 3-digit numbers.

Go!

- 1 Take turns spinning the paper clip 3 times for each number. Write the digits left to right in the order the numbers occur.

- 2 Compare the two 3-digit numbers and find the difference. The player with the greater number rounds the difference to the greatest place-value and gets that number as a score.

- 3 Play the game 2 more times. The player with the higher score wins. For greater difficulty, create 4-digit numbers.
